PROFESSIONAL SUMMARY

Senior Backend Engineer with 8 years of professional experience designing and scaling distributed systems in Java/Spring Boot and Node.js. Track record of building high-throughput, event-driven microservices (Kafka, Redis, Elasticsearch) for high-traffic retail and financial platforms, and leading migrations that cut infrastructure cost and deployment time. Graduate in Software Engineering from the Federal University of Amazonas. Regularly leverages generative AI tools (Claude, GPT, GitHub Copilot) to accelerate delivery, improve code quality, and speed up debugging.

TECHNICAL SKILLS

Languages	Java, TypeScript, JavaScript, Python, SQL
Frameworks	Spring Boot, Node.js, Nest.js, React, Next.js, Angular, ExtJs
Databases	MySQL, MongoDB, Oracle, Redis, DynamoDB
Cloud & DevOps	AWS, GCP, Kubernetes, Docker, ArgoCD
Messaging	Apache Kafka, RabbitMQ, AWS Kinesis, GCP PubSub, Apache Storm
Search & Analytics	Elasticsearch, Apache Solr
Authentication	Keycloak, OAuth2, JWT, Spring Security
Testing	JUnit, Mockito, Jest
AI	GPT, Claude, Gemini, GitHub Copilot, Whisper
Tools	GitHub Actions, GitLab CI/CD, Grafana, Tesseract OCR

PROFESSIONAL EXPERIENCE

TQI <i>Senior Back-End Developer</i>	Oct 2025 - Present <i>Remote</i>
--	-------------------------------------

- Consulting engagement at PagBank (fintech), working on the mobile recharge and services team (gift cards), integrating with multiple partners and high-throughput transactional services
- Microservices in Java and Node.js focused on scalability and low latency
- Asynchronous event-driven communication with Apache Kafka and caching with Redis
- Architectural decisions for high availability, resilience and fault tolerance

Foursales <i>Senior Back-End Developer</i>	May 2025 - Oct 2025 <i>Remote</i>
--	--------------------------------------

- High-performance RESTful APIs in Java 17 with Spring Boot
- Asynchronous events via Kafka and optimized search with Elasticsearch
- Authentication with Keycloak (OAuth2/JWT) and Spring Security
- AI-powered features with Whisper (speech-to-text) integrated with GPT for real-time data

Instituto Amazon Inovare <i>Backend Developer PL</i>	Jan 2025 - Jun 2025 <i>Manaus, Amazonas, Brazil</i>
--	--

- Large-scale file management system with intelligent search (OCR + Elasticsearch)
- APIs in Node.js/TypeScript/Nest.js for high-volume document processing
- Full CI/CD pipeline with GitHub Actions, ArgoCD and Kubernetes on AWS (EKS/EC2)
- Internal training on DevOps tooling and Claude Code in the development workflow

Americanas s.a. <i>Backend Developer PL – 3 Black Fridays</i>	Oct 2022 - Dec 2024 <i>Remote</i>
---	--------------------------------------

- Search and autocomplete architecture at scale
- Java microservices with Spring and messaging via GCP Pub/Sub, AWS Kinesis and Apache Storm
- Migration from Apache Solr to Elasticsearch and distributed MongoDB management

- Deployment via GitLab CI/CD to Kubernetes on AWS and GCP
- **Kept search up under peak load through 3 consecutive Black Fridays, with zero downtime**

Linx

FullStack Developer – 1 Black Friday

Jan 2021 - Oct 2022
Manaus, Amazonas, Brazil

- B2B SaaS for e-commerce storefront management
- Node.js/TypeScript microservices and asynchronous messaging with Kafka
- MongoDB, DynamoDB and Redis caching
- Angular 2 frontend and deployment with AWS ECR/ECS
- **Reinforced clients storefront platform during Black Friday**

iTRIAD Research and Development

Junior FullStack Developer

Nov 2019 - Jan 2021
Manaus, Amazonas, Brazil

- Financial and management systems for Yamaha
- Backend in Java 8 and Spring Boot, frontend in ExtJs
- Oracle database
- Automation and web scraping with Node.js and RabbitMQ

FUCAPI

Fullstack Developer

Feb 2016 - Feb 2017
Manacapuru, Amazonas, Brazil

- SOFT-AM initiative: web and mobile projects for education
- Involved from planning through final delivery
- Best practices for efficient, maintainable code

EDUCATION

Federal University of Amazonas

Jan 2018 - Dec 2023

Bachelor's Degree in Software Engineering

Complete education focused on systems development, software architecture, agile methodologies, and software engineering best practices.
